

Women's Body Size Charts for Normal, Petite and Tall Standard Sizes

Our standard sizes are based on body measurements we determined in accordance with the data of the most recent German measurement survey. For the perfect fit, find your individual standard size. It will take you only five minutes and all you need is a flexible tape measure. Stand up straight but relaxed, ideally only wearing your undergarments. **Measure close to the body, because the numbers provided in the charts are referring to body measurements.**

BUST

Wrap the measuring tape around the fullest part of your bust and measure the bust circumference horizontally around your body. Try not to breathe deeply. Measure and compare your bust, waist and hip measurements.

WAIST

Take the measurement around the smallest part of the torso without applying pressure.

HIP

Measure horizontally around the fullest part of your hip.

Women's Standard Sizes

How tall are you?

- 164 - 170 cm: Look at the chart for **standard sizes**.
- Smaller than 164 cm: Look at the chart for **petite sizes**.
- Taller than 170 cm: Look at the chart for **tall sizes**

*When you get varying results comparing your body measurements to the charts, orient on the bust girth, as the waist and hip measurements may be altered. In our **configurators**, you have the possibility to adjust sizes individually.*

Measure and compare your bust, waist and hip girth.

KÖRPERMASSE DAMEN NORMALGRÖSSEN für eine Körpergröße von 164-170 cm
